COMPACT

WinLine rental - with WinLine compact you get a customised complete solution at a fixed monthly price per user.

With WinLine compact, you are flexible in every respect. Use the complete ERP/PPS and CRM solution without having to make a large investment. This is because you use WinLine compact on the basis of a monthly fee per user with short contract terms.

Update maintenance is already included in the monthly user price, so that you receive version updates in which legal changes or service enhancements are implemented automatically and at no additional cost. Even the basic WinLine compact package contains all company-relevant functionalities and covers the company areas of financial accounting, controlling, merchandise management, purchasing, warehouse management, cost accounting, asset accounting and production.

Numerous additional modules and flexible data access, e.g. via web browser, smartphone or tablet, round off the wide range of functions. This makes WinLine compact the ideal complete solution for your company.

Monthly user fees

Scaled prices according to number of users	WL compact	WL compact+	WL compact CRM	WL compact DIGITAL*
	Costs per user/month in €			
1-4 users	€ 94,00	€ 117,00	€ 21,40	€ 60,00
5-8 users	€ 87,00	€ 110,00	€ 21,40	€ 53,00
from 9 users	€ 78,00	€ 101,00	€ 21,40	€ 44,00

All prices in EUR including update maintenance contract, plus VAT.
Valid from 1.1.2026. Subject to changes and errors.
Prerequisite: Windows operating system, Internet access

* Also available as a server licence (without WL CRM & Workflows and WL MOBILE) for € 440/month for unlimited user access.

+ Update maintenance included in the usage fee
+ Cancellable monthly
+ Direct conversion to WinLine purchase licence possible

More information on WinLine compact can be found on our website: www.mesonic.com.

TAILOR-MADE SOLUTION

Basic module WL compact

ACC1
FIBU financial accounting is first and foremost a commercial information tool; it is practically the heart of every company. Because you can only manage what you can measure.

ACC2
Only those who have administrative tasks efficiently under control can save themselves a lot of effort, costs and, above all, time. This is precisely why the WinLine ACC2 module controls the entire administration of your merchandise management, takes over the organisation and administration of your projects and monitors quality management.

PPS
From production planning to resource and capacity planning, WinLine PPS offers everything a classic series manufacturer needs. The graphical control centre and the simulation of production orders complete the range of functions.

CAMPAIGN MANAGEMENT
Control and monitor your sales and marketing campaigns. Create, send and save serial mails and letters, lists and analyses. Individual templates, the inclusion of variables and integration into Microsoft Office solutions optimise handling.

ARCHIVING
Archive your WinLine documents in our integrated archive system. system. You can summarise related processes using links and 'brackets' and quickly find them again using the automated keywording.

SYSTEM TOOLS
WinLine provides you with numerous tools for managing and administering the system. These include, for example, a wizard-supported list generator, the management information system, master data import/export and a form editor.

Advanced module WL compact+

In addition to the functional scope of the basic WinLine compact package, it contains these additional tools:

ACC1+
Use the liquidity analysis to monitor the financial situation of your company and the payment behaviour of your debtors. You can shorten the payment paths of defaulting customers with the extended dunning management.

ACC2+
Here you have the option of picking goods and creating down payment and partial payment invoices.

PPS+
If you are unable to carry out a specific production task yourself or your internal resources are fully utilised, you can use external production. This is where you manage the external allocation of production orders.

BI+
Systematically analyse your data on the basis of documents, articles, representatives, budgets, etc. or from a geographical perspective - across all clients, financial years and applications. The results are clearly displayed in a dashboard and can be automatically reported within the company. You can create comprehensive analyses and calculations with the integrated, powerful calculation tool.

SYSTEM TOOLS+
Here you still have administration options: assign access authorisations, monitor the audit, adapt screen masks or start complex processes automatically, e.g. evaluations. You can also archive all receipts in the WinLine and automate and record your incoming invoices.

WL compact Additional modules

CRM

CRM & WORKFLOWS
From manual to digital - with the integrated workflow management system, you can automate your individual business processes. Of course, CRM and ERP functions are fully integrated in the WinLine compact series, so that your data is always up to date.

MOBILE
Work in WinLine in real time from any location by accessing your company data via a web browser or the WinLine apps for smartphones and tablets. Two-factor authentication ensures a high level of security for user access to WinLine.

DIGITAL

CRM & WORKFLOWS / MOBILE
The full range of functions of the add-on module WinLine compact CRM add-on module. Two-factor authentication provides additional security for user access to WinLine.

BI CORPORATE
Create reports, statistics and analyses in graphical form - simply, quickly and clearly. You can automatically create and forward analyses for internal reporting.

VIEW 360
How is the various data in the WinLine actually connected? The links between accounts, articles, projects, contacts, documents, etc. are graphically illustrated here.

FORM
Design tests, surveys, master data masks and even your own apps directly in the WinLine.

VOUCHER PRO
Benefit from the automated voucher receipt process and process your incoming invoices digitally - from entry to checking and approval. Customised, of course!

EBILLING
Benefit from the advantages of electronic invoices. With WinLine compact DIGITAL you can create, send, receive and process them in compliance with the law.
